PowerShell cmdlets and functions can't do everything

Format, manipulate, parse, or process a piece of data
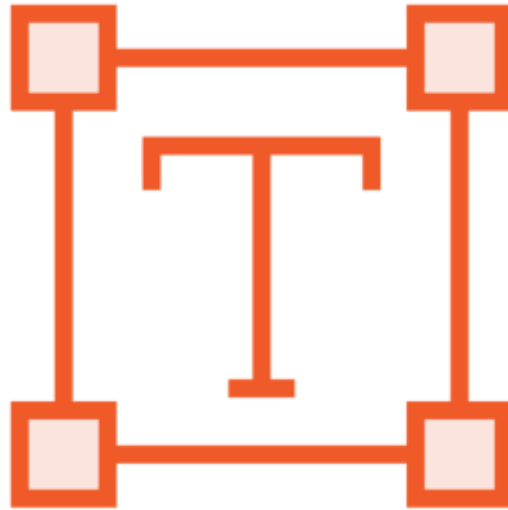

Fill in a gap

Polish a PowerShell expression
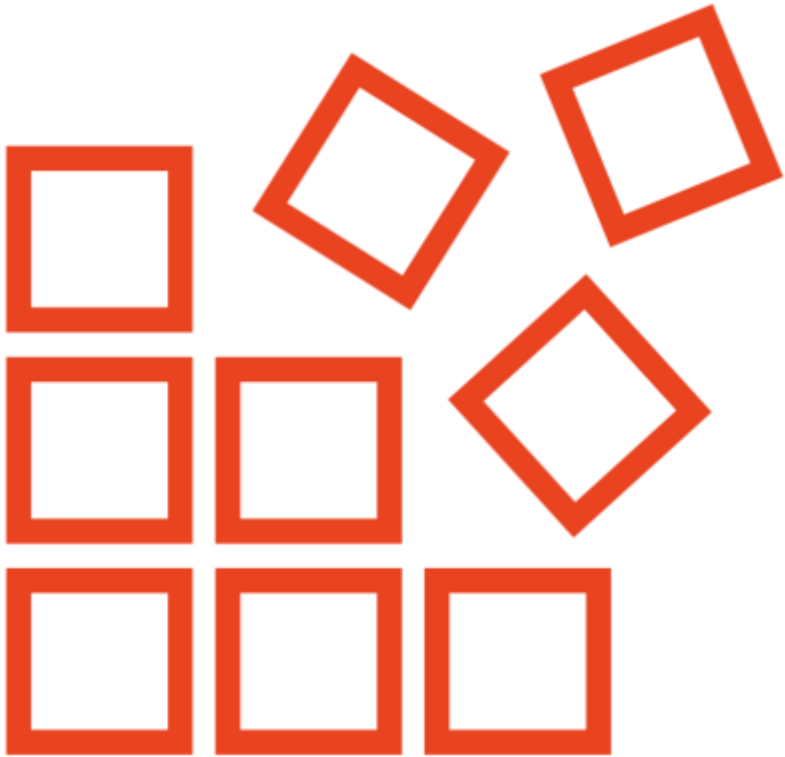

Common Object Types

Dates

Strings

Numbers

Use Get-Member to discover methods

Leverage dotted notation

Leverage PowerShell operators

Demo

Common String, Date, and Number Techniques

Next Steps

PowerShell is a foreign language

Always be thinking "objects"

PowerShell remoting and remote management

Lay the foundation for PowerShell scripting

Read, Imagine, Try, Repeat
